

# **Description of the digital formats**

## **GeoTiff:**

- World map: scale: 1:20 million / Europe map: scale: 1: 4,2 million
- Compatible with MapInfo, ArcGIS and Acrobat Pro
- Format: LZW compressed TIFF
- Resolution: 300 dpi
- Image resolution: world map: 23014 x 16871, europe map: 14764 x 10276

## **Description:**

Our GeoTiff file is a raster image with a print quality of 300 dpi. Geographic information systems such as MapInfo and ArcGIS are compatible. GeoTiff images are useful for presentations, cropping and printing. The image can be enlarged, but loses its quality with increasing size.

---

## **Locked PDF - Not editable**

- Compatible with Acrobat Pro
- Format: Locked PDF
- resolution: Vector Art

## **Description:**

The vector encrypted PDF - Non-editable you can print and annotate notes (with Acrobat Reader). Due to the available vector data, you can print as large as you want without sacrificing line and font quality. This PDF has only one layer and cannot be opened with Adobe Illustrator.

---

## **Editable GeoPDF**

- Compatible: Adobe Illustrator, MapInfo and ArcGis etc.
- Format: PDF
- resolution: Vector Art

## **Description:**

With our GeoPDF - Editable you have full access to the content of the map. Due to the existing Vector data you can print as large as you want without loss of quality of the lines and fonts. This PDF contains various levels, such as roads, rivers, area names, city names and more. Programs such as Adobe Reader geographic tools help you determine latitude and longitude for areas on the map. For users of Avenza MAPublisher there is full projection information and many layers that provide extra GIS information.
